About me

Aspiring Web Developer passionate about crafting modern, interactive, and user-friendly web applications. With a strong foundation in HTML, CSS, React.js, JavaScript, and responsive design, I enjoy transforming ideas into functional and visually appealing interfaces.

Fueled by creativity (and a good cup of coffee, of course!), I am eager to collaborate and bring fresh perspectives to projects. A strong team player, I continuously enhance my skills by exploring the latest design trends and technologies.

Experience

On-the-Job Training (OJT) Full-Stack Developer

Management Information and Computer Services | July 2024 - December 2024

- Developed and maintained web-based systems for internal use.
- Designed and implemented front-end and back-end functionalities using PHP, JavaScript, MySQL, and CSS.
- Successfully built
  - Project Management System - Streamlined task tracking and project assignments.
  - Annual Investment Program - Automated investment planning and budgeting.
  - Certificate & ID Maker - Created a tool for generating digital and printed certificates/IDs.
- Collaborated with the team to analyze system requirements and improve overall UI/UX and database performance.

Expertise

- Web Developer | Front-End Focused

Passionate web developer specializing in React.js, JavaScript, HTML, CSS (Tailwind), and responsive design. Skilled in building interactive UIs and dynamic layouts, with basic knowledge of PHP, MySQL, and backend integration.
